v.

MARICOPA COUNTY

BRIAN IRVINE

JUDGE WARNER

MINUTE ENTRY

An evidentiary hearing was held in this public records case on May 29, 2026. The Court set the evidentiary hearing to take evidence on whether Defendant Maricopa County has produced all records within its control that are responsive to Plaintiff's public records request. This ruling incorporates and adopts the Court's April 14, 2026 minute entry ruling (filed April 16, 2026).

In its April 14, 2026 ruling, the Court found that much of what Plaintiff requested was not records that existed, but answers to questions about accountability and controls in the administration of elections, and much of the relief Plaintiff sought was beyond the Court's authority in a public records case. The Court also found that the declarations the County submitted with its briefs regarding the scope of its document search were conclusory, thus requiring an evidentiary hearing to determine whether there are records in the County's control that are responsive to Plaintiff's requests, but which were not produced.

Based on the evidence, the Court finds that the County's search for responsive records was sufficient, and that it produced all responsive records to Plaintiff.

06/01/2026

Based on this conclusion, and on the rulings in Court's April 14, 2026 minute entry,

**IT IS ORDERED** denying the relief requested in the Petition for Special Action.

Because no further matters remain pending, this is a final, appealable judgment pursuant to Ariz. R. Civ. P. 54(c).
